PRIMARY HEALTH CARE SERVICES IN RURAL SARAWAK
Paul G. Y. Chan

SERVICED WITH A TEACHING HOSPITAL OF 200 BEDS, A UNIVERSITY TRAINING HOSPITAL, A DISTRICT HOSPITAL, AND A PRIMARY HEALTH CENTER, THE VARIOUS LEVLES OF HEALTH CARE SERVICES PROVIDED TO THE POPULATION OF SARAWAK ARE AS FOLLOWS:

- Primary Health Care Services:
  - Rural areas: Basic Health Clinics
  - Urban areas: General Practitioners, Medical Officers
  - Hospitals: Specialist Services

- Immunization of Mice Against Chinese and Taiwanese Strains of Schistosoma Japonicum Using Nitrosoguanidine (NTG) for 60 Min.

- Snakes served in a market: 20% of snakes in a large market in Sarawak are potentially dangerous to humans.

IMPACT OF RAPID URBANIZATION AND MUNICIPAL DEVELOPMENT ON ACID-BASE VARIABLES: A STUDY IN ACCRA AND TEMA, GHANA
W. A. Chinny

This paper, which is illustrated with graphs, maps, and histograms, uses survey data and information from other sources to investigate the effects of rapid urbanization and municipal development on the acid-base variables in Accra and Tema, Ghana.

- Resistance to Filarial Disease: In Vivo Potentiation of Sulfa-Doxine and Pyrimethamine against Plasmodium Falciparum from Tulou
