

ADSORPTION AND AGGREGATION OF A CATIONIC  
CYANINE DYE ON LAYERED SILICATES

N. Miyamoto (1), R. Kawai (1), Y. Sugahara (1), K. Kuroda (1, 2),  
M. Ogawa (3, 4)

assessing the chemical soil processes, Na-saturated vermiculite was used as a reference mineral and placed in ion-permeable polyamide bags that were buried in clayey acid sulfate soils belonging to three main environments of Lower Cosemone (Senegal). (2) In the field,
