

# When science emancipates people

How can we give a voice to people living in areas coveted by economic powers for resource extraction, urbanisation or tourism? This issue is crucial, particularly for local populations, and requires the creation of specific arguments and data acquisition.

A fishing family processing their mussel catch in Recife, Brazil.

Living in an area does not necessarily mean having a say in how it is run. To influence decisions, you not only have to be invited to express your views, but you also need to be able to argue and defend your opinions against well-organised economic and political lobbies – hence the need for data co-constructed by scientists and members of civil society. Work along these lines has begun in north-east Brazil, with two fishing communities that share the same issues around asserting their rights in coastal territories, as well as systems of organisation in which women play a central role.

... Through studies in north-east Brazil, research teams are helping fishing communities make their views heard ...

The first community is located in an urban area, on a small island in the heart of the megalopolis of Recife, surrounded by shopping centres and factories in a highly polluted environment. Shellfish are harvested from the mud, mainly by men, while women handle all the stages of processing. Shared between fishermen and major economic groups, this area is the site of conflicts over use, risks to fishermen's health and discrimination. While women represent the community's voice, they are unable to assert the importance of their socio-economic role, which is therefore invisibilised.

The second community is located two hours from Recife, in Rio Formoso, in a rural area that attracts many tourists whose motorised boats disrupt the local subsistence fishing industry. Men use small boats to catch fish in the estuary, while women harvest shellfish

and crustaceans in the mangroves. This division of labour is, to some extent, maintained by public policies that favour men in the allocation of boats and access to navigation training. Once again, the community's voice, mainly represented by women, struggles to make its demands heard.

Not only do scientific studies carried out in these areas map environmental vulnerability, analyse pollution risks and assess the state of biodiversity, but they also help develop a participative management approach and back up the two communities' arguments, supporting them in making their voices heard and influencing decisions.

## LIST OF SCIENTIFIC CONTRIBUTORS

### Evolving environments

#### El Niño in the spotlight

Jérôme Vialard, physical oceanographer and climatologist, UMR LOCEAN

#### PIRATA, the observatory in the Tropical Atlantic

Bernard Boulès, physical oceanographer, UAR IMAGO

#### Extreme waves and tropical cyclones

Christophe Menkes, climatologist, UMR ENTROPIE

Jérôme Lefèvre, ecologist, UMR ENTROPIE

#### The variability of upwellings

Vincent Échevin, physical oceanographer, UMR LOCEAN

#### Mapping the tsunami hazard

Mansour Ioualalen, physicist, UMR Géoazur

#### Understanding the complexity of Southeast Asia's climate

Marine Herrmann, physical oceanographer, UMR LEGOS

#### The unsuspected variability of lagoons

Thomas Stieglitz, coastal ecohydrologist, UMR CEREGE

#### Resilient Mexican mangroves

Johanna Jupin, Geochemist, UMR LOCEAN

#### An oasis in an ocean desert

Sophie Bonnet, oceanographer and biogeochemist, UMR MIO

Cécile Guieu, biogeochemist, UMR LOV

#### Resilient coral in New Caledonia

Riccardo Rodolfo-Metalpa, ecophysiologicalist, UMR ENTROPIE

#### Sargassum taking over

Julien Jouanno, physical oceanographer, UMR LEGOS

#### Soot in the water

Xavier Mari, oceanographer and biogeochemist, UMR MIO

Marc Tedetti, oceanographer and biogeochemist, UMR MIO

#### Plastics: from the rivers to the ocean

Lisa Weiss, physical oceanographer, UMR LEGOS, UMR LOPS

#### The fate of river water in the ocean

Nadia Ayoub, physical oceanographer, UMR LEGOS

#### On the trail of ocean plastic

Christophe Maes, physical oceanographer, UMR LOPS

#### Our friends from the deep

Leandro Nole-Eduardo, ecologist, UMR MARBEC

### From micronekton to tuna

Christophe Menkès, climatologist, UMR ENTROPIE

Anne Lebourges-Dhaussy, ecosystem acoustician, UMR LEMAR

### The end of the reign of the anchovy?

Arnaud Bertrand, ecologist, UMR MARBEC

## Societies facing the ocean

### Senegal: the emergence of a resilient fishing industry

Ndickou Gaye, geographer, Cheikh Anta Diop University, Dakar and UMI SOURCE

### The future of the Vezo

Francis Veriza, geographer, University of Toliara and UMR Passages

### Alexandria, how not to adapt?

Sylvie Fanchette, geographer, UMR CESSMA

### Is the sinking of the Mekong Delta inevitable?

Nicolas Gratiot, geophysicist, UMR IGE

### Reducing vulnerability in the city of Douala

Raphaël Onguene, physical oceanographer, University of Douala

### Food security in Polynesia

Marianna Cavallo, ecologist, UMR LEMAR

### The role of women in fishing

Ariadna Burgos, ethnoecologist, UMR PALOC

### Nokoué, a lagoon under pressure

Alexis Chaigneau, physical oceanographer, UMR LEGOS

Yves Morel, physical oceanographer, UMR LEGOS

Victor Okpeitcha, physical oceanographer, Prodata SARL

Zacharie Sohoun, oceanographer, fisherman and biologist, IRHOB and UAC

Thomas Stieglitz, coastal ecohydrologist, UMR CEREGE

## Towards sustainable resources

### A plankton model

Olivier Maury, oceanologist, UMR MARBEC

### Tropical tuna under surveillance

Daniel Gaertner, biologist, UMR MARBEC

### Towards more sustainable baits

Pascal Bach, ecologist, UMR MARBEC

### The birds' share

Philippe Cury, oceanographer and biologist, UMR MARBEC

### Artisanal fishing on an industrial level

Arnaud Bertrand, ecologist, UMR MARBEC

### Food biodiversity

Fany Sardenne, ecologist, UMR LEMAR

### Aquaculture for better nutrition

Maria Darias, biologist, UMR MARBEC

### Gathering data by sailboat

Éric Machu, biogeochemist, UMR LEGOS

### Swimming over underwater habitats

Rodolphe Devillers, geographer, UMR Espace-Dev

Priscilla Dupont, biologist, UMR Espace-Dev

### Shining a light on invisible biodiversity
