INTRODUCTION

Depuis 1991 l'ORSTOM poursuit un programme de recherches sur les fruits et noix de Vanuatu. L'un des objectifs de ce programme est la réalisation d'un fond documentaire sur les espèces fruitières présentes dans le pays.

En Mars 1993, les auteurs du présent rapport ont publié un premier bulletin bibliographique réunissant les références principales des articles de botanique (taxonomie; flore et ethnobotanique) concernant les fruits et les noix.

Ce second bulletin réunit l'ensemble des références compilées durant le déroulement du programme. Ces références sont disponibles et peuvent être consultées ou obtenues au centre documentaire de l'ORSTOM à Port-Vila. Outre les références botaniques déjà citées, on y trouve également les références d'articles traitant de l'arboriculture, des systèmes de subsistance, de la domestication des plantes et de la composition chimique des plantes étudiées.

Ces références (359 au total) sont données par ordre alphabétique d'auteur dans le chapitre 1. Les index thématique et géographique du chapitre 2 permettent une recherche par thèmes et régions géographiques.

Ce bulletin N°2 est, comme le premier, un outil de travail pour les chercheurs qui mèneront, dans le futur, des recherches similaires à Vanuatu. Il ne prétend à aucune exhaustivité mais signale simplement la documentation disponible dans le pays.
